APPENDIX 5 - EXTRACTS FROM FIA APPENDIX L

1. Helmets

Helmets meet one of the standards listed in technical list N° 25 of Appendix J.

2. Head restraint

The wearing in an international event of any device intended to protect the head or neck and attached to the helmet is prohibited, unless the device has been homologated by the FIA and listed in FIA Technical List N° 36.

When the device used is the HANS®, it must be worn only with a compatible helmet appearing in Technical List n° 29. Drivers are strongly recommended to use helmets with tether-anchorage.

Fitted by the manufacturer as original equipment. These helmets are identified by a glossy silver holographic FIA label as illustrated in FIA Technical List N° 29 - Figure 1. It is also strongly recommended to use homologated tethers which are identified by an FIA 8858 label sewn on them.

3. Safety Belts

Drivers must be properly restrained in their seat by safety belts in conformity with the specifications of Appendix J for the vehicle concerned, at all times during an event on special stage.

4. Flame-resistant clothing

4.1 On special stages of rallies all drivers and co-drivers must wear overalls as well as gloves (optional for co-drivers), long underwear, a balaclava, socks and shoes homologated to the FIA 8856-2000 standard. Embroidery sewn directly onto the overalls shall be stitched onto the outermost layer only, for better heat insulation. Backing material of badges and thread used for affixing them to the overalls must be flameproof.

4.2 Substances which may circulate in any cooling system worn by a driver are restricted to water, or air at atmospheric pressure. Water systems must not require the saturation of a garment in order to function. For events taking place in extreme heat, it is recommended that a cooling system be used (connected, for example, to the underwear designed for that purpose and homologated according to the FIA 8856-2000 standard). Exceptionally, driver cooling vests which are not FIA homologated may be worn but shall be in addition to the mandatory homologated underwear. They must include a base garment certified and labeled to ISO 15025; any tubing must be certified and labeled to ISO 17493 and must not be in contact with the driver's skin, and any connection to an on-board system must comply with Article 5.8.6 of the FIA 8856-2000 standard.
